

PLAN OF MAKIN

Planning is an important part of making ('failure to plan is a plan to fail' - as the saying goes) The making of any product requires some form of planning so you have the right parts, the right tools and the right equipment at the right time. A making plan can be written as a flow chart using flow chart symbols. These symbols include; **Terminators** (start and finish 'torpedo-shaped') **Process** 'squares' and **Decision** 'diamonds'.

Quality Control /feedback loops ensure that one stage is done correctly before you move on to the next.

Task: Fill in the missing parts in this flow chart using the words on the left. (Underline the words as you use them).
